

Madeline

I wish to go to Walt Disney World®

Four-year-old Madeline from Eagan has been diagnosed with primary pulmonary hypertension, a lung disorder in which the blood pressure in the pulmonary artery rises far above normal levels for no apparent reason. Madeline is a happy young girl who loves the Disney princesses, and she especially loves Cinderella and Mary Poppins. She also loves to dance, almost anytime. Madeline hears music she begins to dance. Because of her condition, Madeline has had many doctor's visits and many different treatments. Madeline's one wish is to travel with her family to Walt Disney World in Florida. A special trip like this will be a great time for Madeline to rest and relax with her family just being a kid.
